<170> PatentIn version 3.1

<210> 1

<211> 4

<212> PRT

<213> Artificial

<220>

<223> A synthesized oligopeptide

<220>

<221> PEPTIDE

<222> (1).. (4)

<223> A partial structure of GPIGS peptide

<400> 1

Gly Pro Ile Gly

1

<210> 2

<211> 4

<212> PRT

<213> Artificial

<220>

<223> A synthesized oligopeptide

<220>

<221> PEPTIDE

<222> (1).. (4)

<223> A partial structure of GPIGS peptide

<400> 2

Pro Ile Gly Ser

1

<210> 3

<211> 5

<212> PRT

<213> Artificial

<220>

<223> A synthesized oligopeptide

<220>

<221> PEPTIDE

<222> (1).. (5)

<223>

<400> 3

Gly Pro Ile Gly Ser

1

5

<210> 4

<211> 5

<212> PRT

<213> Artificial

<220>

<223> A synthesized oligopeptide

<220>

<221> PEPTIDE

<222> (1).. (4)

<223> The C-terminal Ser residue in GPIGS is replaced with Thr.

<400> 4

Gly Pro Ile Gly Thr
1 5

<210> 5

<211> 6

<212> PRT

<213> Artificial

<220>

<223> A synthesized oligopeptide

<220>

<221> PEPTIDE

<222> (2).. (6)

<223> A derivative of a GPIGS peptide in which the N-terminal Gly residue is modified with Ala.

<400> 5

Ala Gly Pro Ile Gly Ser
